Pile Height: 30mm
Blade Shape: Wave
Density: 21,000/m2

Corvette

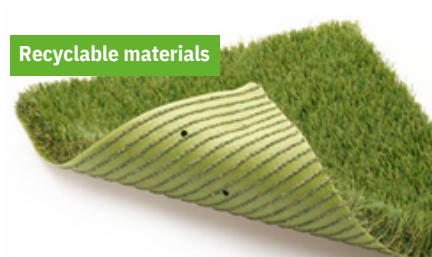

Pile Height: 30mm
Blade Shape: C, D, Diamond
Density: 15,750/m2

Also available in 5m wide rolls

Diablo

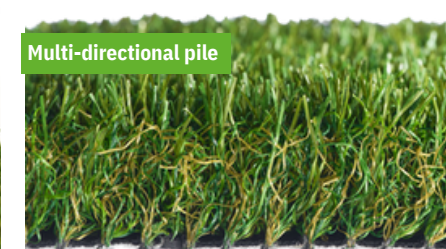

Pile Height: 35mm
Blade Shape: Wave
Density: 25,200/m2

Recyclable materials

Diablo Evolve

Pile Height: 35mm
Blade Shape: Wave
Density: 25,200/m2

Multi-directional pile

Shelby

Pile Height: 40mm
Blade Shape: C & Flat
Density: 14,700/m2

Senna Luxe

Pile Height: 38mm
Blade Shape: Diamond
Density: 29,400/m2

4 coloured grass

Mustang

Pile Height: 38mm
Blade Shape: Diamond
Density: 26,250/m2

Also available in 5m wide rolls

Senna

Pile Height: 38mm
Blade Shape: Micro Nerve
Density: 28,980/m2

*Density is the number of stitches per m2. All grasses have a UV stability warranty of 10 years and are available in 2m and 4m wide rolls "(+/- approx. 0.5%)".

Alpina

Pile Height: 40mm

Blade Shape: Micro Nerve **Density:** 24,150/m²

Multi-directional pile

Puma

Pile Height: 45mm

Blade Shape: Micro Nerve **Density:** 11,025/m²

Polyurethane Backing

Blitz

Pile Height: 37mm

Blade Shape: Propeller **Density:** 26,250/m²

Polyurethane Backing

Mulsanne

Pile Height: 40mm

Blade Shape: S Shape **Density:** 19,950/m²

Why Polyurethane (PU)?

Latex is a very strong and stable backing while PU provides a lighter and more flexible option.

Recommended for dog owners

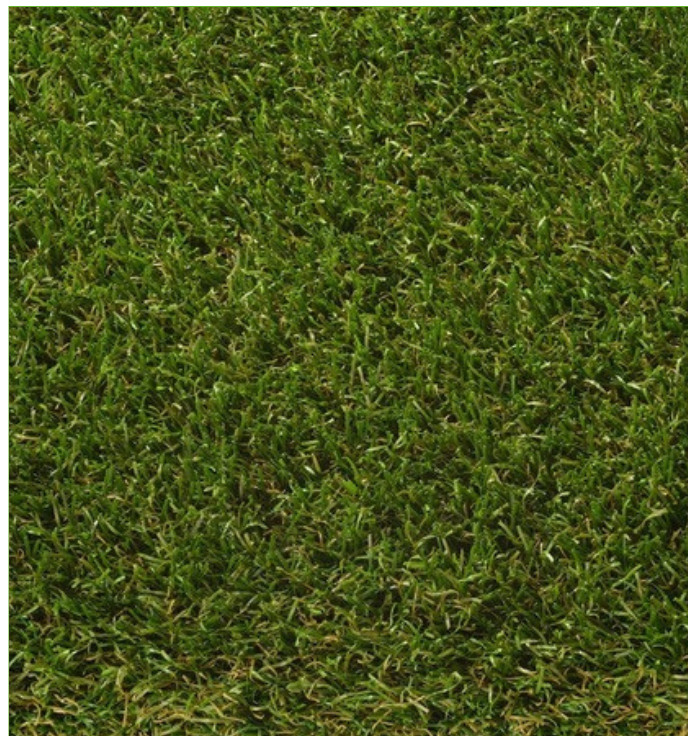

"We are delighted with our new grass. From ordering to delivery and after sales help and advice

– Faultless".

– Mrs B. N

Polyurethane and PP backing are ideal for dog owners

PP Backing

Maximus Evolve

Pile Height: 35mm

Blade Shape: Micro Nerve **Density:** 11,025/m²

Maximus Evolve is a multi directional grass and produced from recyclable materials

Perfect Turf Edge is ideal for landscapers, grass fitters, and DIY'ers who want a clean and innovative edge to their artificial grass lawn

PERFECT TURF EDGE

What are the benefits?

- Saves time and money
- Highly flexible for easy installation achieving perfect straight lines and shallow curves
- Manufactured from high grade structural aluminium
- Perfect for synthetic lawns borders, resin bound pavement and soft-fall restraint
- Available in two profile widths 5mm - 10mm
- High quality finishes for durability and extended life span

Each Pack Contains:

24 linear metres of continuous edging 12 x 2000mm aluminium turf edge strips 12 x aluminium straight joiners 4 x aluminium corner joiners 36 x 150mm galvanised steel fixing spikes Pack Dimensions 2040mm (L) 100mm (W) 60mm (H) Pack weight: 7 (Kg)

Perfect Turf Edge is ideal for:

- Artificial lawns
- Garden borders
- Asphalt and tarmac paths & driveways
- Resin-bound pavement edge restraint and borders
- Playgrounds, child care centres
- Rooftop gardens

Residential and commercial landscapes

Perfect Turf Edge 5mm is more flexible and suited to gardens with curved areas

Perfect Turf Edge 10mm is more suited to gardens with straight edges

PERFECT BORDER EDGE 100mm

What are the benefits?

Perfect Border Edge saves you time and money.

Made from structural garden aluminium with a range of durable anodised and powder coated surface.

Perfect Border Edge is the most trusted Aluminium Garden Edging product used by commercial landscapers around the world.

Perfect Border Edge features:

- Made from structural grade aluminium
- Durable, long lasting anodised surface finish
- Flexible, easily installed in a straight lines or curve
- Resistant to corrosion, fading, warping
- Above or below ground installation

Applications / Installation:

- Lawn / Artificial Grass
- Raised Garden bed
- Paths / Walkways / Driveways
- Concrete / Asphalt
- Curves / Straight lines
- Paving Restraint
- Expansion Joint
- Above / Below Ground Installation

PLAY PAD FOAM UNDERLAY AND SHOCK PADS

PlayPad Foam Underlay

Designed to give a softer feel where artificial grass has been installed onto a base which is either very hard (concrete) or 'gappy' (decking or paving slabs). A 10mm foam pad supplied in 2m wide rolls, length cut to suit.

Shock Pads

When it comes to installing outdoor play areas the safety of children is paramount. Artificial grass provides a good safety surface but requires the installation of shock pads where children's playground equipment is installed.

By combining our artificial turf with our shock pad options, we are able to provide a critical fall height (CFH) certified play area surface to EN1177:2008 standards. This makes our grass range ideal for the vast majority of outdoor play areas. Our shock pads come in a variety of depths, 25mm, 35mm, 45mm or a combination to any depth, catering for critical fall heights up to 2.9 metres.

Critical Fall Height Accreditation

Huracan 30mm
Corvette 30mm
Diablo 35mm

Perfectly Green Grasses are tested and certified to comply with Critical Fall Height requirements.

PLAYTIME DESIGNS

Playtime uses top quality artificial grass in exciting designs to add colour and vibrancy to any artificial grass area. Manufactured to stunning quality, it makes the perfect addition to a school yard, public play area, or even a garden. Integrating seamlessly with any of our range of Perfectly Green grasses, the specialist manufacture of Perfectly Green

Playtime has unbeatable durability and creates spectacular results far beyond that of painted areas that simply wear away with time.

Many standard designs within the following theme categories: Galaxy, Safari, Forest, Sea, Farm, Garden, Traffic and Games. Full Playtime brochure and pricelist available on request.

Playtime designs are available in:

20mm to 30mm fibri-short yarn to suit landscaping grasses

15mm short, curly yarn suitable for play areas

Full Playtime brochure available

“We are all thrilled with the new artificial grass supplied by Perfectly Green. It has meant that the children can now play on the grass in all weather conditions whereas in the past the area had been either a mud bath or a dust bowl. Now it is a lovely, safe and inviting area all year round. I would highly recommend this company”.

- Ms C E A Davy, Headteacher

CORPORATE

BESPOKE DESIGNS AND LOGOS

Brand your artificial grass installation with company, school or event logo – suitable artwork required. Branded logo mats can be used indoors and outdoors, perfect for sports grounds, schools, business buildings, council offices, exhibitions, events, shopping centres, roundabouts, hotels...

ENVIROFILL PREMIUM ARTIFICIAL GRASS INFILL

We supply artificial grass for a variety of applications, ranging from domestic to commercial use.

Each site has different requirements for installation, safety and maintenance. Our range of artificial grass related products will help to ensure a perfect installation, safe use and easy maintenance.

Envirofill®

Non-toxic and completely reusable, Envirofill® makes Perfectly Green artificial grass look and feel great. Microban® antimicrobial product protection works continuously to prevent odours, bacteria and other problems.

**“Thank you very much
for everything & for your
wonderful customer
service”.**

- Mrs A Vallence

Envirofill® is composed of naturally occurring sand found only in the Hickory Formation of central Texas. Its highly-rounded quartz core resists compression so it doesn't continue to compact over the life of your lawn, promoting better drainage.

Inhibits pet urine odour. Microban® technology reduces ammonia odour from urine by 99%. Microban® has been scientifically proven to disrupt the bacteria process that converts pet urine into ammonia odour.

It's cleaner. Microban® antimicrobial protection is infused into Envirofill® during the manufacturing process to help prevent the growth of bacteria, mould, and mildew that can cause stains, odours, and product deterioration.

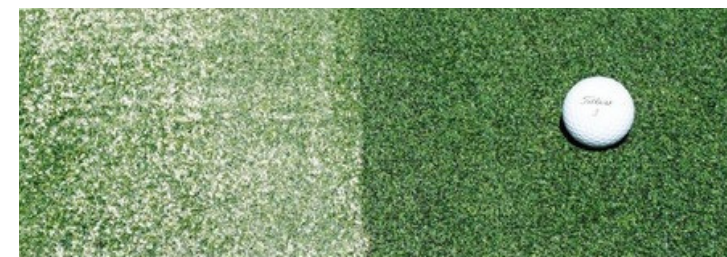

It's reusable. Because of its superior durability, Envirofill's coating and colour are warrantied for 16 years.

ENVIROFILL AND DOGS...

Microban® significantly reduces pet urine odours by up to 99%! How?

- When a pet's body processes nitrogenous compounds, one of the by-products is ammonia
- Since ammonia would be harmful, the body converts the ammonia to urea which is then expelled
- When the urea is expelled onto the synthetic turf infill, naturally-occurring microbes begin to break it down
- The result of the break down is two molecules of ammonia and one molecule of carbon dioxide
- Envirofill® infill is infused with Microban Antimicrobial Technology to help reduce the creation of ammonia

ENVIROFILL AND ARTIFICIAL PUTTING GREENS

Sand filled putting green

Filled with Envirofill®

Envirofill and Putting Greens - Envirofill® keeps your putting green performing better longer. It's durable, reusable, and with built-in Microban® technology, it's resistant to stain-causing bacteria. Because it's non-compacting, it will help your putting green perform its best year after year.

ACCESSORIES AND WEE FREE

Profix Glue tub, 8kg, and hardener

Getting a Perfect Join

If you are joining rolls of grass you will need to use quality products for a perfect job.

Perfectly Green Joining Tape – 300mm wide rolls.

Perfectly Green Polyurethane Joining Glue - tube 310ml, covering up to 1.5m linear. Spread a thin layer of glue, approximately 5 inches wide, onto the joining tape and carefully place the grass together.

Profix Glue tub, 8kg, and Profix hardener, 0.89 ltr, for longer joining sections and covering up to 20-25m linear. Mix together and use as required.

Geotextile Terram to prevent weed growth and promote ground stabilisation, supplied in 4m wide rolls. Not shown

U-pins

High quality 4mm steel U pins for artificial grass installations

310ml Glue Tube

PG Wetbond

Wetbond is a 1 part glue which can be used in damp conditions and can be resealed/reused. Supplied in an 8kg tub Wetbond will cover 20-25m linear.

Glue tubes and joining tape

Wee Free for Dog Urine Smells and Issues

The WEE FREE Sub-Base Soaker has been designed to remove dog urine deposits from within the blades and within the sand and sub base below artificial grass. Suitable for use on both latex and polyurethane backed grass. Made in the UK WEE FREE is the best-selling and most effective enzymatic odour remover on the market. It contains millions of micro-organisms that are naturally present in the soil and break down soil and liquid pet waste. With a PH of 6, it's kind to pets and the environment. Safe to use near ponds.

Designed to:

- Remove pet urine and waste from the base of grass blades
- Remove mould and algae from grass blades
- Prevent mould re growth from grass, patios and paving
- Unblock the drainage holes in artificial grass backing
- Digest uric acid crystals from latex backed synthetic turf
- Works for up to 5 days in damp conditions
- Economical and easy to use
- Fully biodegradable and safe for pets
- Comes with full application guide

“In my opinion the best artificial grass company there is. Excellent range of products, great prices and a sales team who are always helpful. I wouldn't use any other company”.

- Owner, Level Best Landscapes
